New PET/CT Services by Lifescan Imaging with ML²ve at Novena Specialist Center

About Us

Formerly known as ML²ve Medical Diagnostic Suite, Lifescan Imaging with ML²ve is the only standalone private facility outside of hospital equipped with a PET scanner in the Novena precinct, providing unparalleled convenience and accessibility for your patients.

Our Equipment for PET/CT Scan

We use the **Siemens Biograph scanner**, one of the industry's finest volumetric PET resolution, providing precise tumour contouring for more accurate treatment planning for patient-specific dose escalation, as well as improving therapy planning and monitoring.

Featuring the widest bore (78cm) among PET/CT scanners, it offers enhanced comfort, particularly for larger patients. This spacious design helps reduce anxiety and claustrophobia, providing a more relaxed and less intimidating scanning experience.

Our Radiologist

Dr Andrew Tan Eik Hock

Nuclear Medicine Specialist
MBBS (Singapore)
FRCR (Clinical Radiology, United Kingdom)
FAMS (College of Radiologist)
Diplomate Nuclear Cardiology (CBNC, USA)

Dr Andrew Tan Eik Hock is a Consultant Nuclear Medicine Physician.

His main clinical interests are in molecular imaging, theranostics and neurodegenerative disorders. He has undertaken multiple training

stints in various internationally recognized medical centers in the development of his career, which includes Zentralklinik Bad Berka (Germany), Innsbruck Medical University (Austria), European Institute of Oncology (Milan), and Austin Health (Australia).

Why Choose Lifescan Imaging with ML've?

- ✓ Boutique centre that offers privacy and utmost care to patients
- ✓ 10 years' experience in PET/CT imaging with well-trained healthcare professionals
- ✓ Seamless diagnostic imaging services from PET/CT, MRI, CT, Ultrasound to X-Ray

(Formerly known as ML've Medical Diagnostic Suite)

How to Locate Us?

Conveniently located in the heart of Novena's medical hub, our centre is just a short walk from Novena MRT Station, Novena Medical Center and Mount Elizabeth Novena Hospital, ensuring easy access to a range of healthcare services.
